TITLE	Utilization of Residence Hall Facilities, Fall 1991. With Trends from Fall 1982. Report No. 9-92.
INSTITUTION	State Univ. of New York, Albany. Central Staff Office of Institutional Research.
PUB DATE	May 92
NOTE	114p.
AVAILABLE FROM	Office of Institutional Research, State University of New York, State University Plaza, Albany, NY 12246.
PUB TYPE	Statistical Data (110) -- Reports - Descriptive (141)
EDRS PRICE	MF01/PC05 Plus Postage.
DESCRIPTORS	*College Housing; *Dormitories; Facility Utilization Research; Higher Education; On Campus Students; Resident Assistants; Residential Colleges; School Space; *Space Utilization; State Universities
IDENTIFIERS	*State University of New York

ABSTRACT

This report presents data on the utilization of residence hall facilities at campuses of the State University of New York (excluding community colleges) for fall 1991, with summary data from fall 1982 through fall 1991. Part 1 offers seven tables on utilization of original design capacity of residence hall facilities; utilization by institution and institution type; utilization of net revenue-producing adjusted design capacity; student occupancy or net revenue-producing adjusted design capacity; revenue-producing "other" utilization and percent of revenue generated; utilization of net revenue producing adjusted design capacity by rate; distribution of Resident Assistant bed rental waivers in residence hall facilities; and Resident Assistant bed rental waivers in residence hall facilities. Part 2 provides trend data for fall 1982 through 1991 on: total utilization of net revenue-producing adjusted design capacity; percent utilization of net revenue producing adjusted design capacity; trends in percent utilization for each institution; non-revenue assignments in residence hall facilities; revenue producing utilization of residence halls for purposes other than resident student occupancy; and number of students per Resident Assistant. Part 3 contains a publications list. A brief narrative summary and definitions are included. (JB)

PREFACE

This report on Utilization of Residence Hall Facilities consists of detailed data collected for the eighteenth annual survey which was conducted during the Fall of 1991. The report also contains summary data for Fall 1982 through Fall 1991. Detailed tables for Fall 1974 through Fall 1990 inclusive, are available in earlier reports published by this office (see Publications List, page 54). Details regarding the residence hall program are important in the planning and budgetary functions of each institution. While the survey was specifically designed to meet the data requirements of the State University Central Administration Offices of Institutional Research and Planning, Finance and Business, and Student Affairs and Special Programs, requests for these data have subsequently come from many sectors both inside and outside of the State University.

The study includes all State-operated institutions which have residence hall facilities. A listing of these institutions, organized by institution type, can be found on page vi; reference to institution type in this publication, therefore, includes only those institutions listed. Residence hall facilities available at locally sponsored Community Colleges under the program of the State University of New York are financed in a different manner and are not included in the study.

Graphic displays of percent utilization of residence hall facilities are again included in this publication. Trend data are displayed for each institution, as well as Fall 1991 utilization by institution within institution type.

A study of this complexity could not have been completed without the full cooperation of the institutional respondents and other Central Staff Offices. We also thank our secretarial staff, Mrs. Claudia Fleming, and Mrs. Vikki Mazzone, who prepared the final transcript and distributed all copies of the publication.

INTRODUCTION

The methodology and definitions used in this study have been developed to be consistent with the State University of New York Policies and Procedures Manual. Definitions of the basic concepts used in this report are provided beginning on page xii.

A general policy change occurred in University management of residence halls between 1985 and 1986. One manifestation of the change is the restructuring of dormitory fiscal operations into a Dormitory Income Fund Reimbursable (DIFR) structure. Accompanying this new structure is a series of alterations in rate setting and revenue generation:

1. The concept of a single University-wide standard double room rate has been replaced by the acceptance of institution-specific standard double room rates, which must fall within a specified range of the average of standard double room rates for all of the State-operated institutions of the State University of New York.

2. The ratio of superior and reduced rates to the standard double rate is now at the discretion of each institution, pending approval from Central Administration.

3. The algorithm to calculate the number of allowable Resident Assistant waivers has been greatly simplified. The RA factor concept has been discontinued, and an acceptable range of RA waivers from 4% to 6% of resident student occupancy (headcount) is now in effect.

4. It is now permissible to place lodgings into an inactive status under certain conditions.

For information about the policy, refer to the Dormitory Income Fund Reimbursable (DIFR) Guidelines published in November 1987 by the State University of New York Office of Finance and Business.

Three tables have been designed to provide supporting information to evaluate the effect of these policy initiatives on the utilization of residence halls. Table 5, Utilization of Net Revenue Producing Adjusted Design Capacity by Rate, shows the schedule of rates developed by each institution as of Fall 1991, as well as the occupancy of facilities at each rate. Tables 6 and 7, which deal with Resident Assistant Bed Rental Waivers, show the accepted range of bed rental waivers. Increased variability in amount of Resident Assistant Waivers (i.e. .66, .4, .74) has resulted in the necessity to report the more unusual waivers in terms of ranges rather than by actual waiver portion.

The report contains seven tables of data for Fall 1991:

Table 1 presents aggregated data which describes the original capacity of the residence hall facilities, the permanent and temporary adjustments to this original capacity, net available space and percent of actual utilization.

Table 2 provides more detailed data concerning the types of utilization of net available space depicted in Table 1. Resident student utilization as well as other types of utilization are arrayed in categories, as described in the column headings.

Table 3 focuses on resident student utilization summarized on Table 2. Data are arrayed by institution, type of accommodation and rate paid by the students.

Table 4 describes revenue-producing utilization of residence halls for other than student occupancy. Net utilization of each campus is arrayed with "other uses" data to clarify the relationship between amount of space available and "other" revenue-generating effort. "Other uses" data are arrayed within each category by bedcount, headcount, and percent of revenue generated.

Table 5 arrays the utilization of net revenue producing adjusted design capacity by rate. For each institution, revenue producing utilization is shown in total, then detailed--along with the associated rates charged in Fall 1991--by utilization of non-married enrolled students; that of students accommodated as married; and other revenue-producing utilization. Also, the bedcount of unoccupied facilities is shown for non-married enrolled students and married students.

Table 6 displays, by institution, the distribution of Resident Assistant Bed Rental Waivers, total student occupancy, and the ratios of resident students to resident assistants. Because of an increase in unusual RA/Student ratios, they are now grouped into the following units/ranges: 2 to 1; 1 to 1 (the two most common ratios); .75 to .99; .60 to .74; and .59 or less.

Table 7 augments Table 6 and displays total resident student occupancy, the authorized range of bed rental waivers--from 4% to 6% of the total resident student occupancy--and the actual bed rental waivers used, in terms of bedcount and headcount (number of RA's). Finally, the resident student-to-resident assistant ratio is shown for each institution and as an overall ratio.

Tables 8 through 12 depict trends concerning utilization of residence hall facilities from Fall 1982 through Fall 1991:

> Table 8, total utilization (headcount); Table 9, percent utilization; Table 10, non-revenue assignments; Table 11, revenue producing utilization for purposes other than resident student occupancy (bedcount); and Table 12, the ratio of students to resident assistants. The definitions over the ten year period are consistent with those described beginning on page xii.

SUMMARY OF DATA

In the Fall of 1991, the total current utilization of residence hall facilities (headcount) was reported to be 60,672. This level of occupancy represents the smallest utilization (headcount) in last ten years, even after adding the headcount at the Institute of Technology at Utica/Rome, which is included for the first time in 1991 (see below and tables 1 and 8). The net revenue producing adjusted design capacity has increased from last year to 62,713 (bedcount). This is largely the result of re-activating existing facilities which were not active in previous years and the addition of the facilities at the Institute of Technology at Utica/Rome.

The combination of adding facilities at Utica/Rome and re-activating existing facilities, along with a decrease in the number of occupants (headcount), has substantially affected the occupancy level of residence hall facilities in Fall 1991. In fact, the occupancy level (96.7%) is lower than last year, and is the lowest level recorded in the past ten years.

Resident student utilization was 98.5% of the total Fall 1991 headcount utilization.

The trend data indicate that for eight of the last ten years revenue producing utilization of residence halls for purposes other than resident student occupancy has steadily increased, with only two years, Fall 1986 and Fall 1989, showing a decrease from the previous year (see Table 11). The figure for Fall 1991 (992) is easily the highest level attained in the last ten years.

While there were some increases and decreases in the number of students per resident assistant for individual institutions, the average number of students per resident assistant for each sector and for the system as a whole has remained relatively constant for the past ten years (see Tables 7 and 12).

Summary of Utilization of Original Design Capacity of
Residence Hall Facilities State-Operated Institutions,
State University of New York Fall 1982 Thru Fall 1991

Year	Original design capacity (bedcount)	Net Revenue producing adjusted design capacity (bedcount)	Total utilization (headcount)	Percent utilization of net revenue producing adjusted design capacity
Fall 1982	67,965	62,484	65,132	104.2
Fall 1983	68,027	62,574	62,662	100.1
Fall 1984	68,431	62,746	61,554	98.1
Fall 1985	68,432	62,737	61,701	98.3
Fall 1986	68,432	62,488	61,506	98.4
Fall 1987	68,427	62,313	62,703	100.6
Fall 1988	68,837	63,141	63,957	101.3
Fall 1989	68,837	62,668	62,039	99.0
Fall 1990	68,951	62,438	62,324	99.8
Fall 1991	70,015	62,713	60,672	96.7

The percent utilization of net revenue producing adjusted design capacity was reported as 96.7 percent in the Fall of 1991. This percent utilization represents a substantial decrease from last year, and indicates that the revenue producing adjusted design capacity of the University dormitories as a whole has grown while the utilization headcount has dwindled. The data for Fall 1991 reveal that, ten of the twenty-six institutions reported utilization of 100 percent or greater (last year there were eleven and in Fall 1989 there were thirteen). This year (Fall 1991) three other institutions reported utilization ranging from 95.0 percent to 100 percent, while last year there were eight institutions in this category.

The University Centers at Albany, Binghamton, and Buffalo, each have a substantial decrease in utilization from last year. Stony Brook is the only University Center showing an increase in utilization from last year. The largest changes occurred at Binghamton and Buffalo, with percent utilization decreasing from 101.6% to 98.0% and 97.8% to 94.0% respectively. These changes were due to an increase in the net revenue producing design capacity at Binghamton and a decrease in total utilization headcount at Buffalo.

The Fall 1991 data reveal that the percent utilization of net revenue producing adjusted design capacity for the University Colleges has retreated to a level under 100 percent after reaching its highest level in eight years in Fall 1990 (100.8%). University colleges that had substantial decreases in occupancy levels from Fall 1990 to Fall 1991 are: Buffalo, Fredonia, Oneonta, Potsdam, and Purchase.

The Fall 1991 data indicate that the percent utilization at the six Colleges of Technology/Agriculture remains high at 100.4%, but it is the lowest percent utilization since Fall 1986, and the second lowest occupancy rate recorded in the last ten years. For the second consecutive year, the utilization rate at each of the six Colleges of Technology/Agriculture has declined from the previous years level, with the largest declines occurring at Alfred and Farmingdale. These are the only two Colleges of Technology/Agriculture which show a utilization figure below 100 percent. The under-utilization figure represented at these two colleges is due to the increasing difference between the number of beds in facilities available for use and the number of occupants actually residing in those facilities.

Of the 26 institutions surveyed, facilities at 16 were under-utilized (showed a negative net utilization). Nine of these sixteen were able to generate revenue through utilization other than student occupancy. Based on projected revenues assigned to the Dormitory IFR for this year, one institution (Brockport), reported an estimated revenue generation of 0.0% for their "other utilization" facility. Percent of revenue generated for all "other utilizations", including the facility at Brockport, averaged 43.0% of the total possible student revenue generation, with a high of 100% and a low of 0.0% (see Table 4).

DEFINITIONS

Residential Capacity Descriptors

BEDCOUNT--a unit of measure used to describe the capacity of the facility for residential purposes.

ORIGINAL DESIGN CAPACITY--the original residential capacity of the facility (expressed as BEDCOUNT*) as determined by architectural plans.

PERMANENT ADJUSTMENTS TO ORIGINAL DESIGN CAPACITY--permanent conversions of on-campus facilities which increase or decrease their residential capacity (expressed as BEDCOUNT).

NON-REVENUE ASSIGNMENTS--residential capacity (expressed as BEDCOUNT) exempted from revenue production for special uses such as for RESIDENT ASSISTANTS. These assignments are subject to annual review by Central Administration.

NET REVENUE PRODUCING ADJUSTED DESIGN CAPACITY--the capacity of the facility (expressed as BEDCOUNT) available for revenue producing uses. (ORIGINAL DESIGN CAPACITY, less NON-REVENUE ASSIGNMENTS, plus ADDITIONS OR DELETIONS TO ORIGINAL DESIGN.)

"SINGLE", "DOUBLE", "TRIPLE", ETC.--refers to the DESIGN CAPACITY of the facility, NOT its level of occupancy. For example, a "TRIPLE" is NOT a crowded double, but a facility DESIGNED for three occupants.

Actual Occupancy/Use Descriptors

HEADCOUNT--a measure of use which is the number of students or other persons occupying the facilities usually for residential purposes. Non-residential use of a facility, (e.g. office space) measured in terms of HEADCOUNT, is the number of students displaced by the use of the facility for other purposes.

RESIDENT STUDENT OCCUPANCY--the HEADCOUNT of enrolled students and their spouses who reside in residence hall facilities. (This excludes RESIDENT ASSISTANTS.)

RESIDENT ASSISTANTS--students assigned to and residing in residence hall facilities for the purpose of peer counseling and the betterment of the quality of life within the residence hall complex. The BEDCOUNT of facilities dedicated for RESIDENT ASSISTANT occupancy is exempted wholly or in part from revenue production.

OTHER USES--uses of residence hall facilities for non-residential purposes such as office space or classrooms, or for residential use by students from other colleges or special non-student residential occupancy.

LEVEL OF OCCUPANCY--that is, SUPERIOR occupancy is a room occupied at the election of the student(s) by fewer people than its design capacity; STANDARD describes occupancy at the exact level of a unit's design capacity; and REDUCED occupancy refers to a room occupied by more people not at the election of the student(s), than its design capacity.

Utilization Indices

PERCENT OF REVENUE GENERATED -- FOR REVENUE-PRODUCING OTHER USES...the estimated percent of revenue which this use will yield compared to what it would yield for regular student use at the given rate.

CURRENT UTILIZATION--the total actual utilization (expressed as HEADCOUNT*) of an occupied facility's available revenue producing capacity. This is the sum of total RESIDENT STUDENT OCCUPANCY and total OTHER USES.

NET UTILIZATION--the CURRENT UTILIZATION less NET REVENUE PRODUCING ADJUSTED DESIGN CAPACITY. This figure is negative (-) if the facility is under-utilized and positive (+) if the facility is over-utilized.

TABLE 2

Footnotes

[1]Excludes Empire State College, College of Environmental Science and Forestry, College of Optometry, and the Statutory Colleges.

[2]Headcount is the same as net revenue producing adjusted design capacity because there are no under-or-over-utilization measures for these cases. The number of adjusted design capacity beds used for such purposes as Guest Rooms, Conference Centers, Administrative Office Space, Classrooms, Educational Programs, State Agencies, etc., is the same as the total possible number of persons (students) who are displaced by these "Other Utilization" arrangements.

ALL FOOTNOTES APPEAR ON THE FOLLOWING PAGES

TABLE 3

Footnotes

[1]Excludes Empire State College, College of Environmental Science and Forestry, College of Optometry, and the Statutory Colleges.

[2]If headcount exceeds bedcount, the accommodation is over-utilized or "crowded". If bedcount exceeds headcount, the accommodation is under-utilized.

[3]Unoccupied beds in rooms, suites, or apartments.

[4]Includes rooms, suites, and apartments.

[5]Other types of accommodations, including, but not limited to, space used as sleeping quarters not originally designed for that purpose, such as lounges and study areas where the adjusted design capacity bedcount is zero; and septuples and octuples with the appropriate adjusted design capacity bedcount.

[6]Consists of converted lounge space where adjusted capacity bedcount is zero.

[7]Consists of septuples and/or octuples with the appropriate adjusted design capacity bedcount.

[8]Consists of large room(s) designed to house six students.

[9]Consists of two bedroom apartments which were designed to accommodate four students.

[10]Consists of three bedroom apartments which were designed to accommodate six students.

[11]Consists of studio, one bedroom, and four bedroom apartments. One bedroom and studio apartments are classsified as "other", since these types of apartments were not specifically designed for one student occupancy. They were originally designed as studios or one bedroom apartments, and based on the particulars of the facility, the design capacity varies.

[12]Consist of smaller rooms which, together, were designed as suites or apartments to accommodate six students.

TABLE 3 (continued)

Footnotes (continued)

[13]Consists of double rooms designed to accommodate two students, but also contain kitchen facilities.

[14]Consists of space used for sleeping quarters not originally designed for that purpose, where the adjusted design capacity is zero.

[15]Consists of converted study space where the adjusted design capacity bedcount is zero, and octuples consisting of smaller rooms, which, together, were designed as suites to accommodate eight students.

TABLE 4

Footnotes

[1]See the DEFINITIONS section for a description of "percent of revenue generated".

[2]Excludes Empire State College, College of Environmental Science and Forestry, College of Optometry, and the Statutory Colleges.

[3]Net Utilization is derived in Table 1, and is displayed here to facilitate comparison between under-utilization and amount of revenue-generating "other" utilization.

[4]Total and subtotal percent columns are weighted averages.

[5]Due to the Fall 1990 estimation of revenue generated for the Thompson Conference Center at Brockport (0.0%), this percent of revenue generated is substantially lower than it was several years ago.

[6]While there are 201 beds assigned to the Thompson Conference Center, the semester occupation varies substantially, and based on Fall 1991 estimations, there will not be any revenues assigned to the Dormitory IFR for 1991-92.

ALL FOOTNOTES APPEAR ON THE FOLLOWING PAGES

TABLE 5

Footnotes

[1]Unless otherwise indicated, rate shown is per occupant, not per dwelling, for one semester time period. Rates are those current as of Fall 1991.

[2]Excludes Empire State College, College of Environmental Science and Forestry, College of Optometry, and the Statutory Colleges.

[3]This is a superior rate charged students whenever a room or suite is occupied by fewer persons than the designed capacity, with such occupancy being at the request of the occupants and not resulting from room assignments by the college over which the student has no control.

[4]This "other revenue" use represents an estimated revenue generation of 100% of the total possible standard revenue at this rate.

[5]This is a reduced semester rate offered to students when dormitory facilities are occupied by more persons than the design capacity, including situations of occupancy by students in facilities such as converted lounges, study rooms, etc.

[6]This "other revenue" use represents a revenue generation of approximately 65% of a $1,220 standard double semester rate.

[7]An approved bed rental rate for a single room type is charged to students occupying designed single rooms as well as to students occupying rooms and suites converted from lounge space.

[8]Married students are billed for the entire apartment (17 apartments total) at a semester rate of $2,799 regardless of the number of individuals occupying an apartment.

[9]This "other revenue" use represents a revenue generation of approximately 42% of the total possible standard revenue that could be generated from resident student occupancy.

[10]This is a superior bed rental rate charged to a student occupying an originally designed double room and/or suite which has been converted to single occupancy housing.

[11]These figures represent the rate per person per month.

TABLE 5 (CONTINUED)

Footnotes (continued)

[12]This "other revenue" use represents an estimated revenue generation of 43% of the total possible standard revenue at this rate.

[13]This "other revenue" use represents an estimated revenue generation of 17% of the total possible standard revenue at this rate.

[14]This "other revenue" rate represents a potential semester rate of $1,135.00 per person, generated from student occupancy of the Thompson Conference Center. However, there are currently no revenues that are anticipated to be assigned to the Dormitory IFR for that occupancy. Thus, the projected revenue generation is 0.0% of the total possible standard revenue at the $1,135.00 rate.

[15]This is a rate charged students occupying a double room with a kitchen.

[16]This "other revenue" use represents an estimated annual revenue generation of 6.6% of the total possible standard revenue at the $1,118.00 rate during the academic year. The 6.6% is based on annualized revenue projections of approximately $27,573 for this alternate use facility as compared to the total possible student revenue of approximately $415,900 generated during an academic year.

[17]This is an approved single bed rental rate charged to students occupying designed single rooms as well as to students occupying rooms converted from lounge space.

[18]This is a bed rental rate charged to one person if the apartment is fully occupied (4 students/apt.). However, if only one person occupies an apartment, then the student is charged the full occupancy rate of $2,400.

[19]This "other revenue" use represents a revenue generation of approximately 26% of a $1,150.00 semester rate.

[20]This is a situation where a standard double bed rental rate applies to dormitory facilities that are occupied by more students than the design capacity.

TABLE 5 (CONTINUED)

Footnotes (continued)

[21]Married students are billed monthly per apartment at this rate.

[22]Married students are billed in this case for entire apartments at this semester rate regardless of the number of individuals occupying the apartments.

[23]These figures were equated to a semester basis. The Fall rates (shown here) are less than the Spring rates because charges are actually on a monthly basis. There are fewer months (4 mo.payable) in the Fall semester.

[24]This "other revenue" use represents an estimated annual revenue generation of 61% of the total possible standard revenue at the $2,280.00 rate per semester.

[25]This "other revenue" use represents an estimated annual revenue generation of 19% of the total possible standard revenue at the $2,280.00 rate per semester.

[26]This is a situation where an approved bed rental rate for designed single rooms is being charged students who are occupying converted study rooms.

[27]This is a situation where a standard double bed rental rate applies to some designed double rooms that are occupied by one student.

Footnotes

[1]Excludes Empire State College, College of Environmental Science and Forestry, College of Optometry, and the Statutory Colleges.

[2]The students shown here as Resident Assistants have received whole or partial bed rental waivers as indicated by the distribution of such waivers. These Resident Assistants perform a range of assignments which vary in type and degree of commitment. Therefore, the ratios shown here do not necessarily reflect differences in Resident Assistant services available to students.

[3]Includes a bed rental waiver of 3.00 for each of three resident aassistants.

[4]The actual bed rental waived is 1.75.

TABLE 7

Footnotes

[1]Excludes Empire State College, College of Environmental Science and Forestry, College of Optometry, and the Statutory Colleges.

[2]The setting of guidelines for authorized bed rental waivers has been changed by the Central Administration Office of Student Affairs and Special Programs to a concept of an authorized range rather than an algorithm based on an RA factor. The range extends from 4% (low) to 6% (high) of the resident student occupancy (headcount). The resulting figures in these columns are thus measures of headcount.

[3]The students shown here as Resident Assistants have received whole or partial bed rental waivers as indicated by distribution of such waivers. These Resident Assistants perform a range of assignments which vary in type and degree of commitment. Therefore, the ratios shown here do not necessarily reflect differences in Resident Assistant services available to students.
